Main page

Buttons for navigation around main functionalities of the webpage.

When the user is at the selected option, the button will be underlined so users are aware of the navigation.

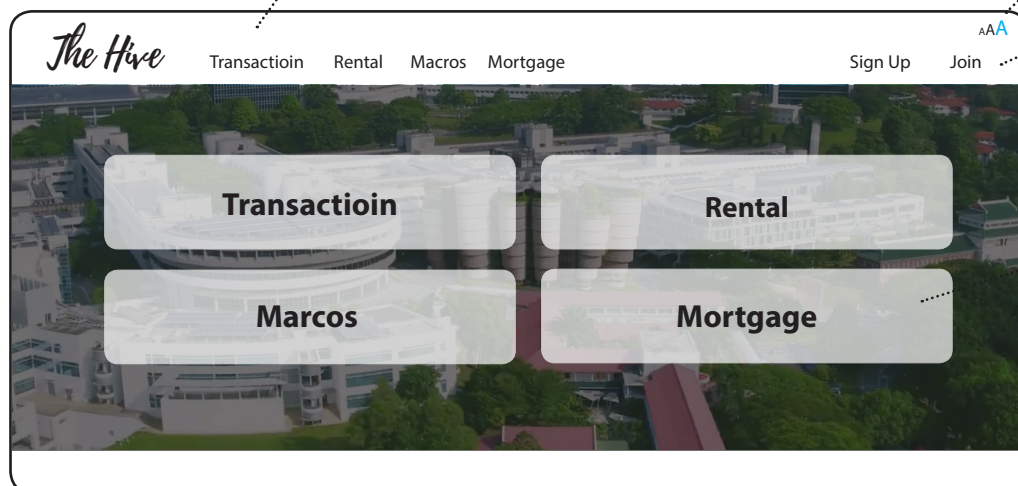

Provide users with the option to edit the font size, allows user with poor eyesight to see the words clearer

Login and sign up option for users

With a personalized account, users can receive more suitable suggestions each time they enter and can save preferences and user details.

Shows the main functionalities offered by the webpage, includes available properties for buy/rent, a mortgage calculator, and macros.

Button will be highlighted when cursor hovers over to emphasize selection. Each button will lead to their respective pages as detailed in the designs below.

Transaction/Rental Page

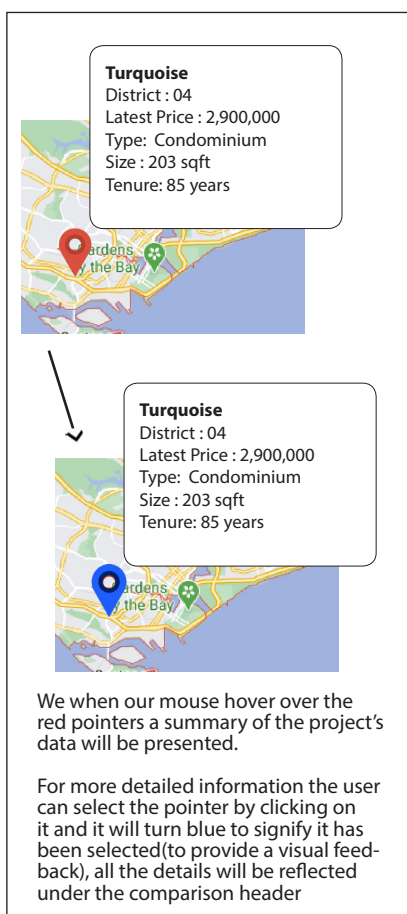

Transaction and rental page will show approximately the same layout, the differences being the projects shown in each page

The markers signifies the property project available in our database. Pointers will be marked base on the longitude and latitude. By default all the project will be reflected on the map before any filter is added.

Suggestions of unselected projects base on what the user has chosen. By default it will reflected properties in the the more popular district

Latest transaction or rental made are summarised here for the user's reference

We will allow users to login with their details and information stored in our database

Allow users to sign up base using other platform's account detail. It is faster and also implemented in most apps

Macros page

Macros are one of the features added in this app to give users key insights of macro economic factor.

Housing prices is correlated heavily with market performance.

The visual graphs added are to allow the users to understand the trend and distribution of the selected macro and aid them in their purchase/rental of a housing property.

Calculate

In this page, there are several required user input fields.

Users can click on the various options to select the options provided.

Each input field has a placeholder that describes what the user can enter at the input.

Some input fields, like loan tenure, have a plus and minus sign to facilitate user input.

With this layout, users are less likely to enter invalid input.
